◆ DILIGENCE

◆ CAPITAL

◆ ASSET MGMT

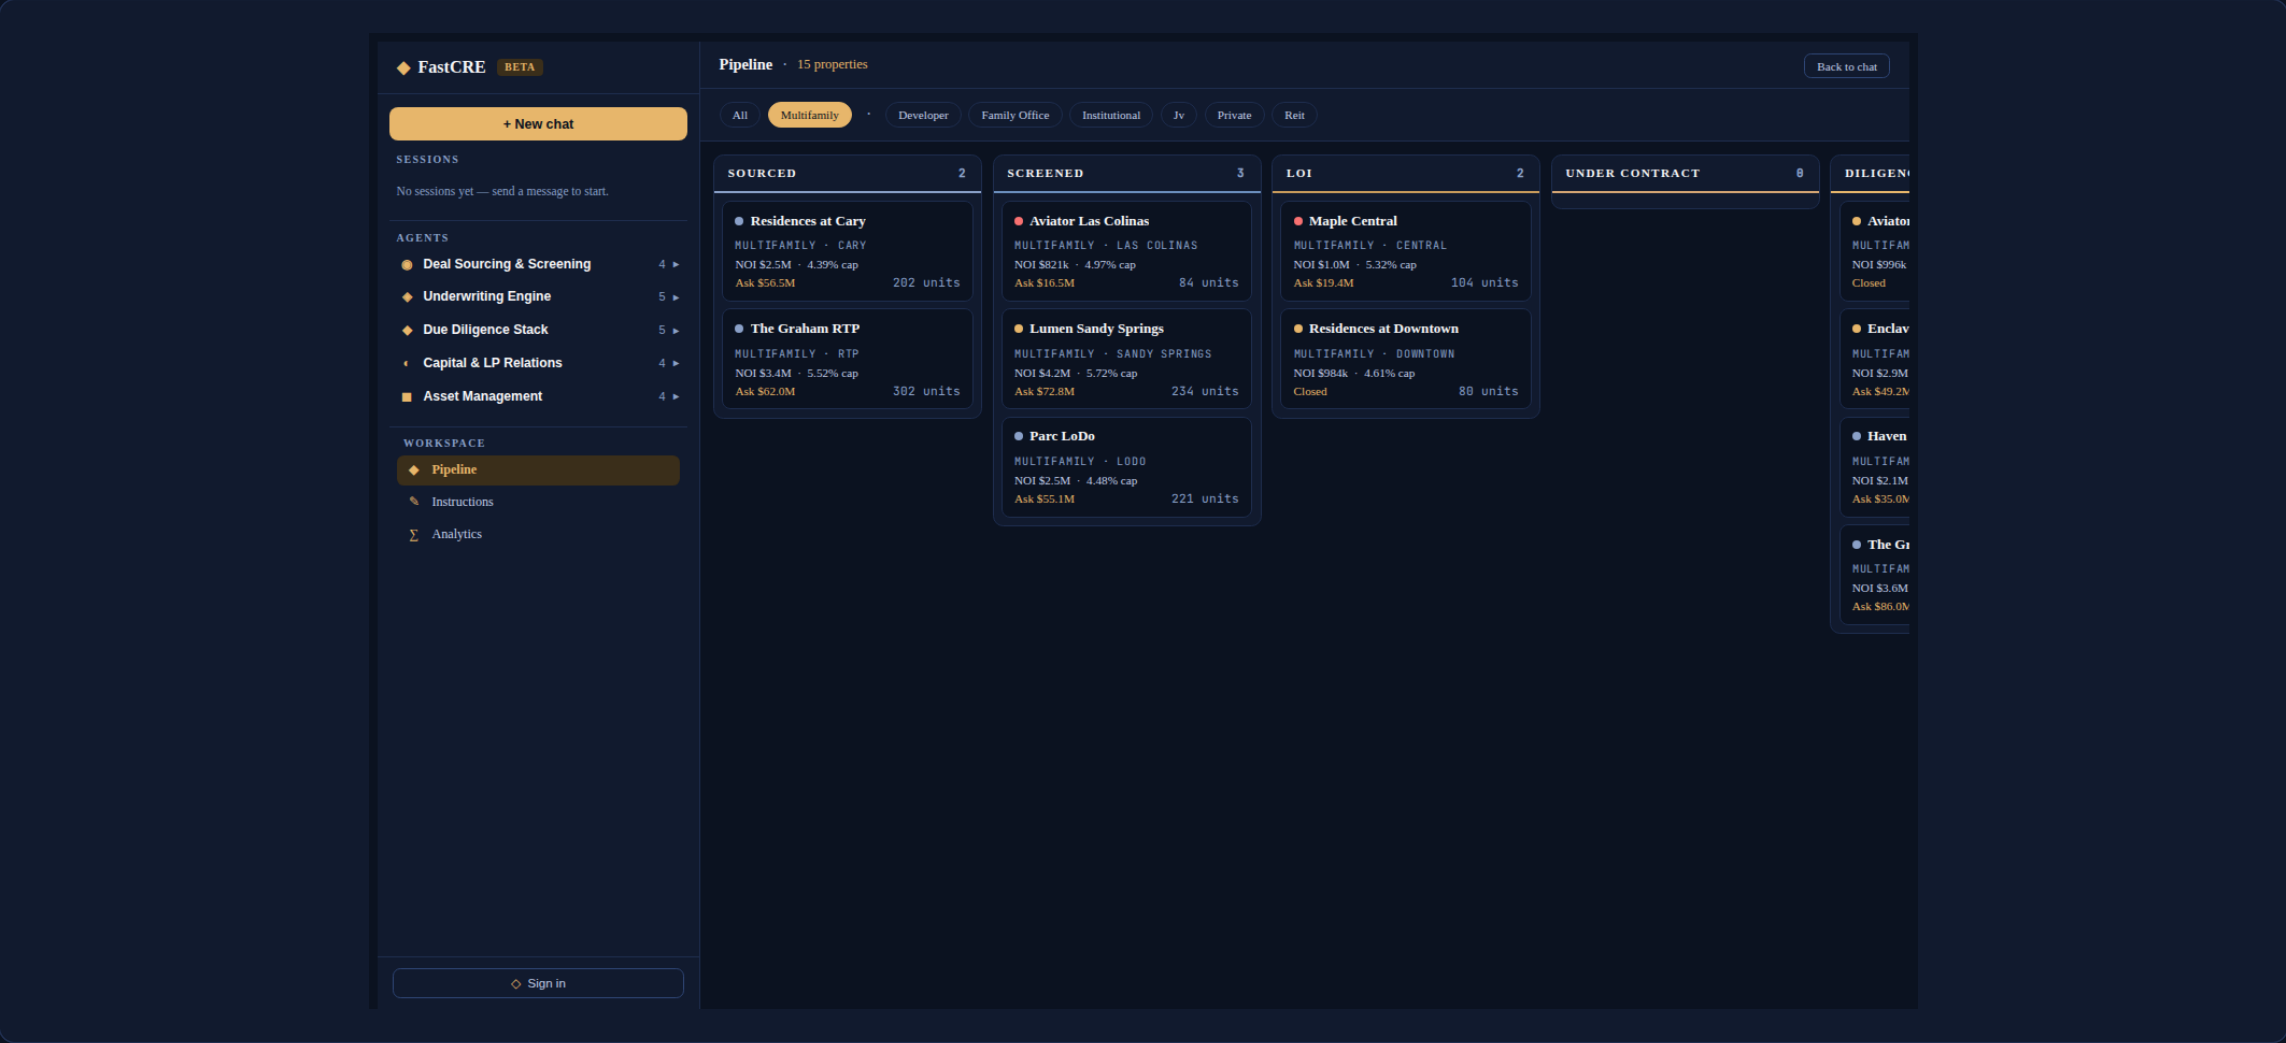

See every deal at a glance

The pipeline board spans the full deal lifecycle — from the first broker tip to the asset you've owned for years. Heat dots flag seller motivation, each card surfaces the numbers you'd actually screen on.

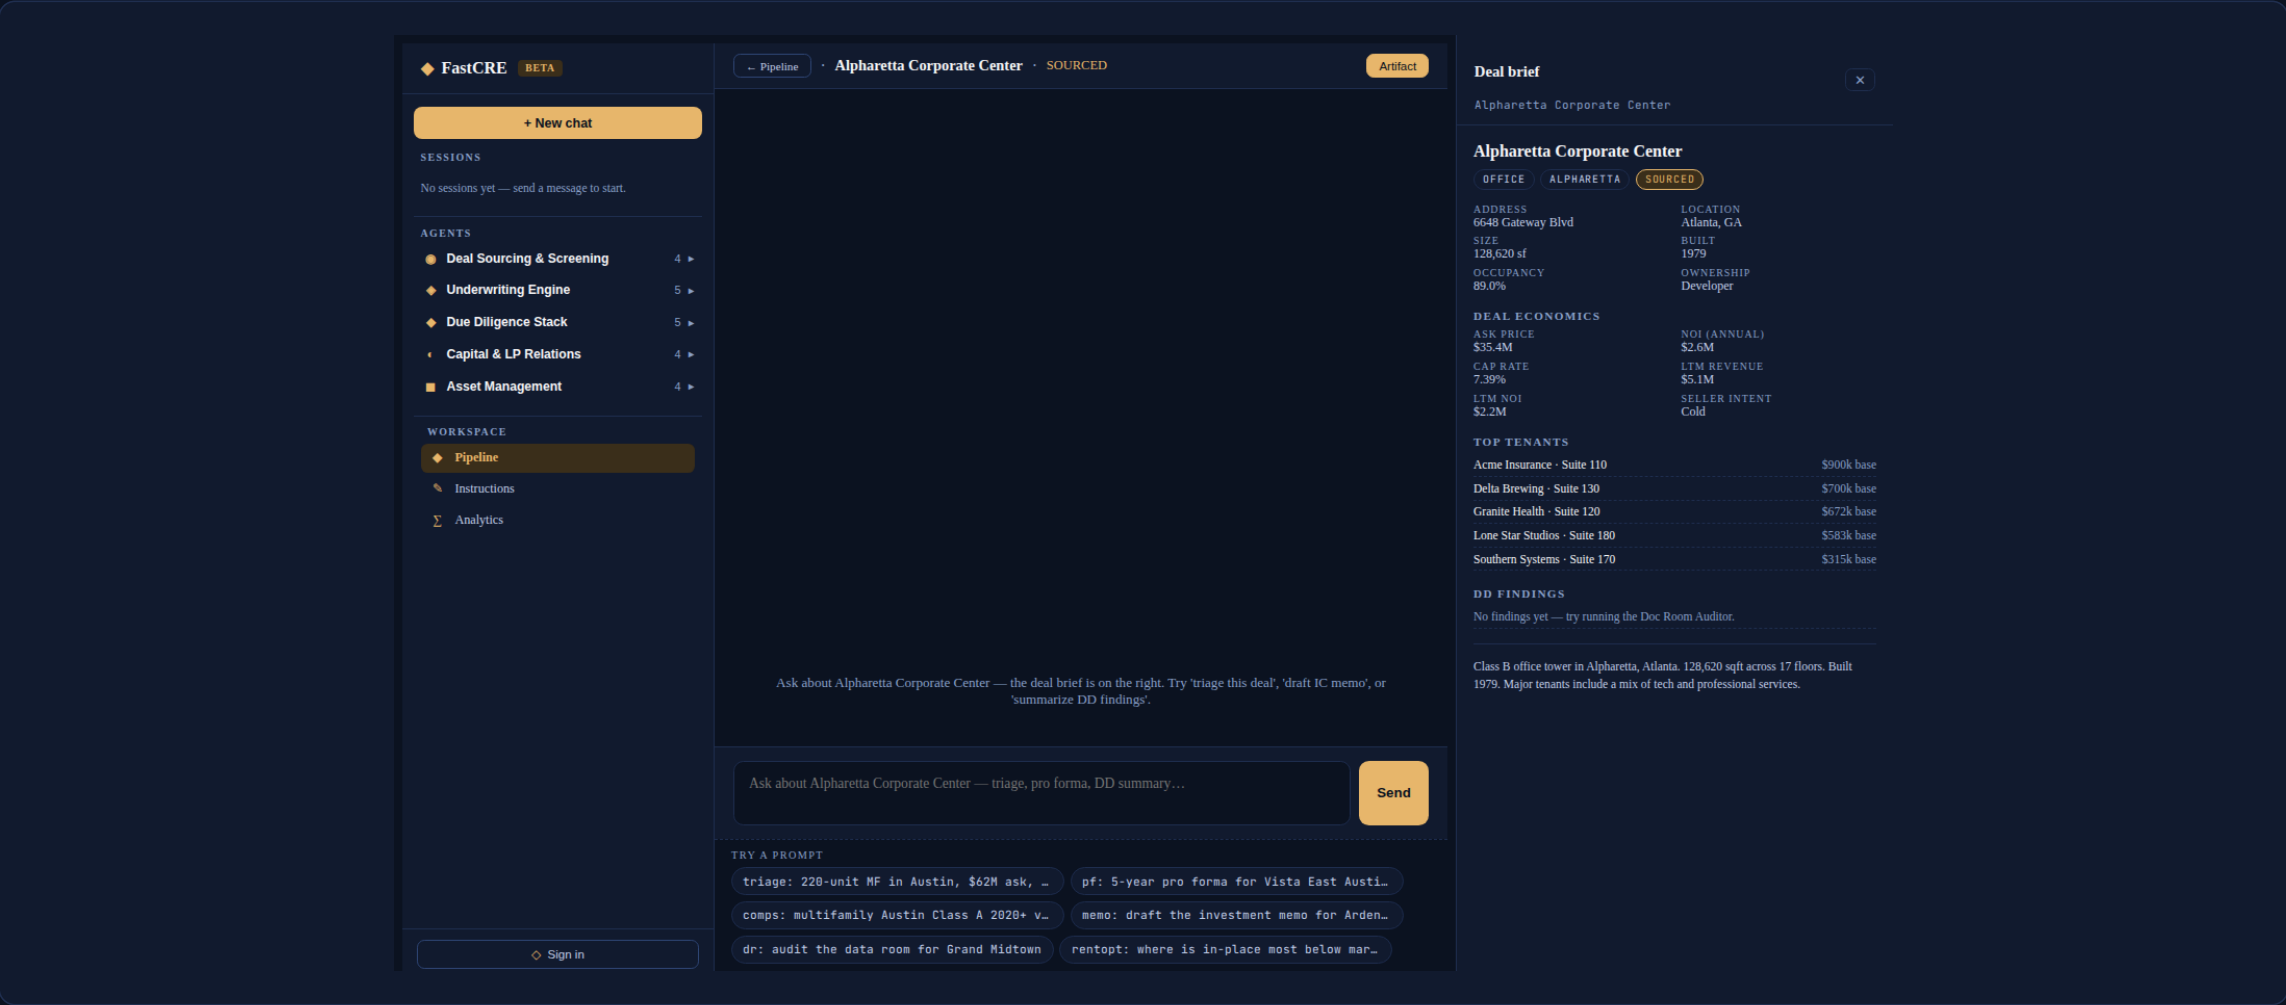

Filter the board in a click

Asset type, ownership, stage — stack any of the filter chips and the kanban narrows instantly. Every card opens into its own workspace with the brief already written up.

One workspace per deal

Open a card and the squad is scoped to that property. Address, occupancy, LTM financials, top tenants and open DD findings are already pre-rendered on the right — ready to work off.

Your team, composed

Sessions and the full squad on the left, the live conversation in the centre, artifacts on the right. Type a message or click a sample prompt — the right specialist picks it up.

Deal Triage Agent

Artifact

trriage: 220-unit MF in Austin, \$62M ask, 4.9% cap in-place

DEAL TRIAGE AGENT

Verdict: No-Go

Rationale:

Valuation: The \$62M ask at a 4.9% in-place cap is well below the average market cap rate for Austin multifamily (6.13% from recent comps). This implies a significant premium to market and likely negative leverage.

Market: While Austin multifamily shows healthy rent growth (~4.2% YoY) and moderate vacancy (~5.3%), buyers are transacting at much higher cap rates, indicating a disconnect between seller expectations and market reality.

Deal-specific risk: No property-level details (rent roll, T12) are available to justify the below-market yield

FastCRE · Comp Finder

Artifact

comps: multifamily Austin Class A 2020+ vintage

◆ COMP FINDER

No direct matches for "Class A, 2020+ vintage" multifamily in Austin, but here are recent Austin multifamily sales comps:

Cap rate median: 6.53% (range: 4.26%–7.23%)

Price per SF median: \$361.25 (range: \$323–\$444)

Oakwood Apartments (7.23% cap, \$444/SF) and Legacy Apartments (4.26% cap, \$323/SF) are outliers—likely due to age, quality, or submarket. Most comps cluster around 6–7% cap and \$340–\$380/SF. For true Class A, 2020+ vintage, expect pricing at the lower end of cap rates and higher

Tune your squad's voice

Every specialist's instructions are editable from inside the app. Codify your house view, your models, your phrasings — and every future answer speaks like your firm.

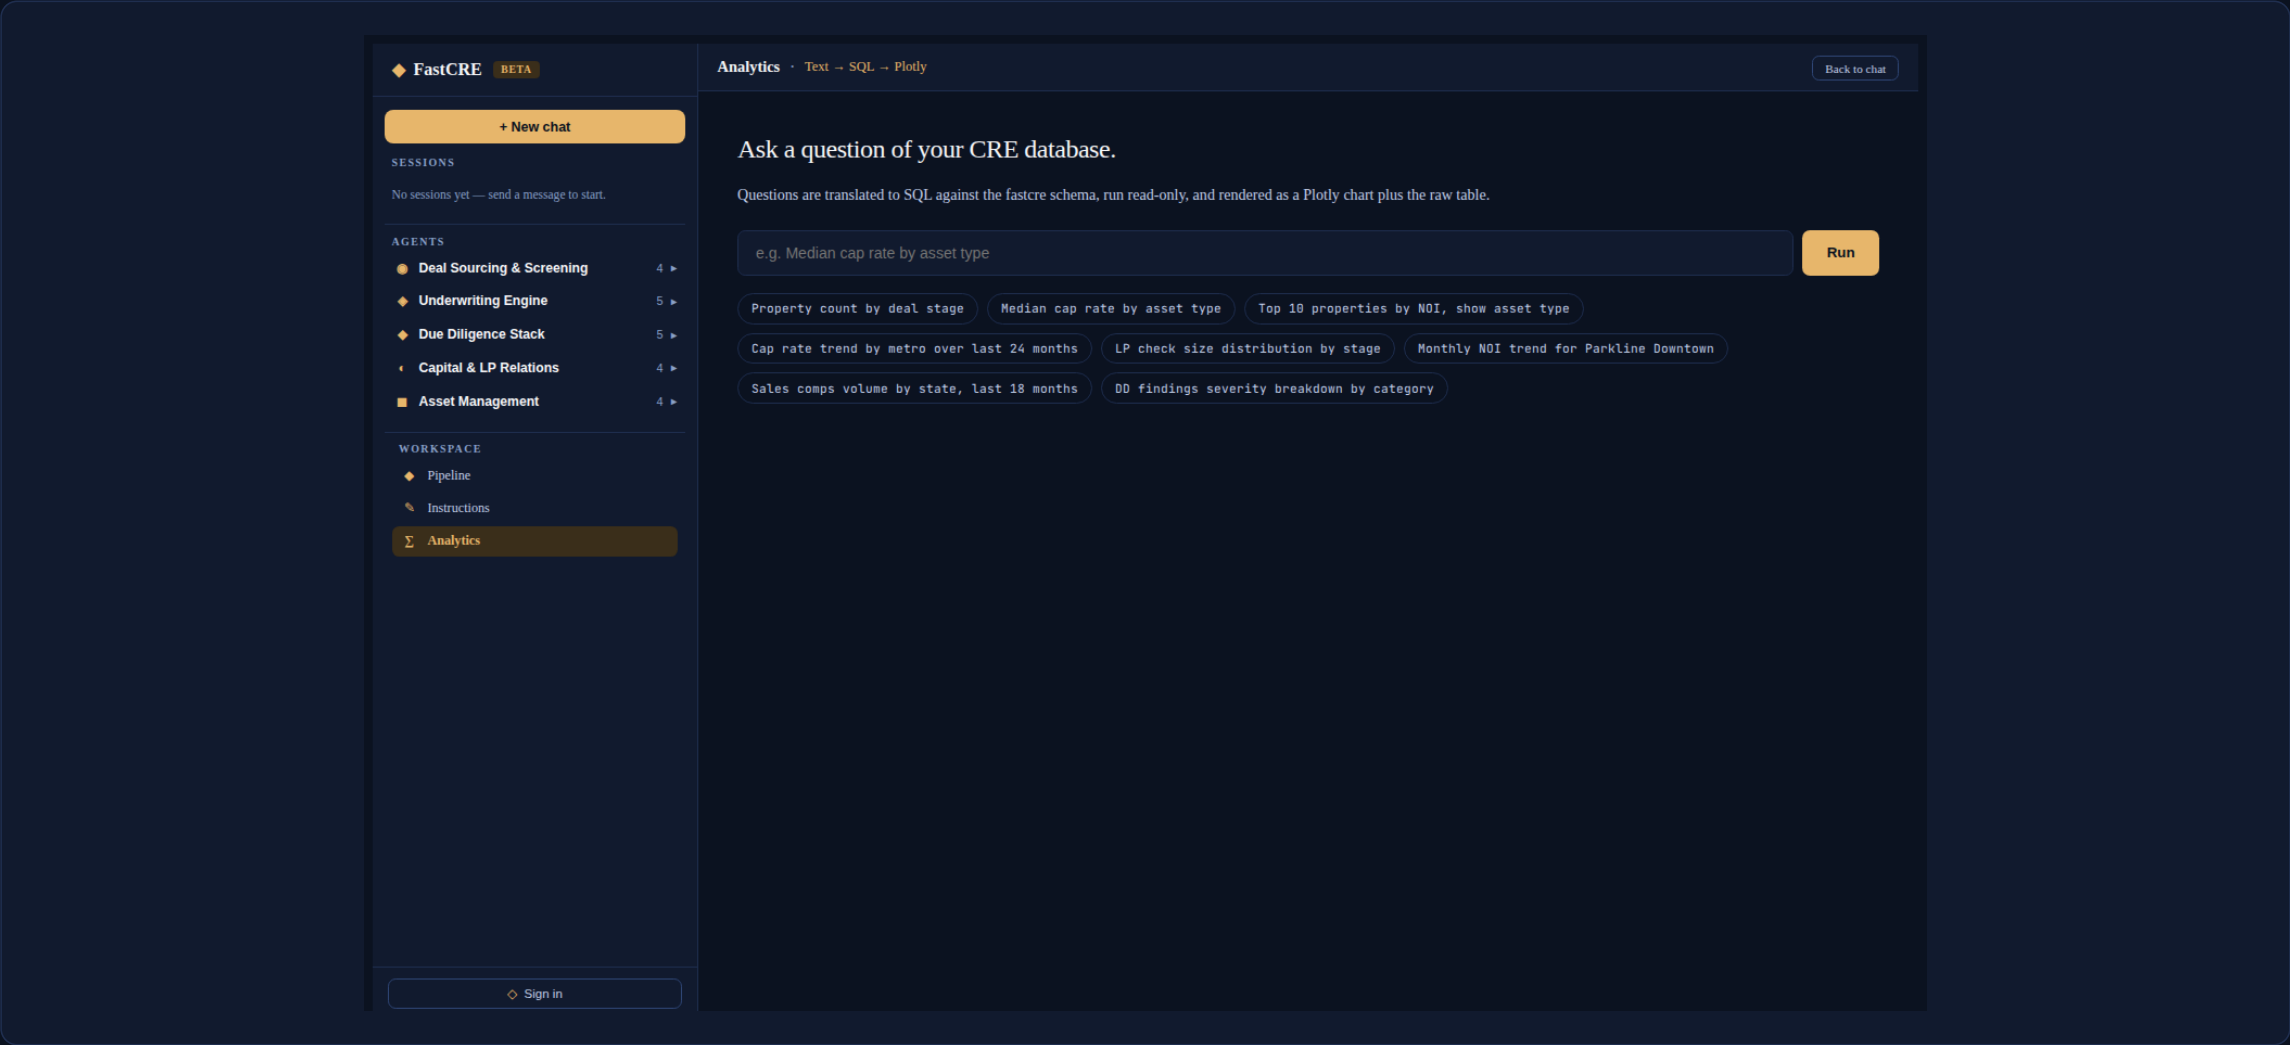

Edit, save, done

Changes take effect on the next conversation. Version control lives in the repo, so every tweak is reviewable and revertable.

Ask your pipeline a question

In plain English. Across every property, operating statement, comp and LP in the system — no SQL, no dashboards to build.

From question to chart

The squad drafts the query, runs it read-only, and renders the answer as a chart you can put in front of the IC — with the raw table one click away for the skeptics.
